## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

## 1. Statement

Novelty (N)	Claims	2, 5, 7-11	YES
	Claims	1, 3, 4, 6	NO
Inventive step (IS)	Claims	2, 5, 7-11	YES
	Claims	1, 3, 4, 6	NO
Industrial applicability (IA)	Claims	1-11	YES
	Claims		NO

## 2. Citations and explanations

## 1. Reference is made to the following document:

D1: EP-A-324322.

2. D1 describes a cutting head for a mowing device which includes a motor (3a), of which the drive shaft (3b) is coupled to a cutting disc (rotary blade 3) perpendicular to said shaft and having at least one blade (radial appendage 4) at the edge thereof, and a lower plate (protective disc 6) essentially parallel to and positioned below the cutting disc (3), wherein the edge of the lower plate (6) has projections (teeth formed between the recesses 7) that are essentially coplanar and extend radially beyond the reach of the blades (see Figure 2).

Therefore, the subject matter of Claim 1 is not novel.

3. The expression "in particular for lawn mowers" in Claim 1 has no limiting effect and, therefore, is not taken into account when determining the novelty of the subject matter of Claim 1 in the assessment made in the above point 2. The attention of the

to a lawn mower does not render said claim novel since the apparatus described by D1 can easily be used to cut grass.

4. D1 also describes the subject matter of Claim 3 (see bearing 16 in Column 3, lines 6-15 and Figure 3) and Claims 4 and 6 (see Figure 2).
5. The combination of features of Claim 2 is not included in the prior art and cannot be derived in an obvious manner therefrom. This combination solves the problem of cutting grass in the presence of hard objects that are smaller in size than the cutting disc without causing damage thereto. Therefore, the subject matter of Claim 2 is considered to be novel and inventive.  
Claims 5 and 7-11 are also novel and inventive since they depend on Claim 2.
